IMPORTANT NOTICE

Water service interruption

Please be advised that on **Tuesday, November 13** the drinking water line will be put into operation. To carry out the work to connect the new water line there will be an **interruption of the drinking water service from 8:00 am to 5:00 pm** for all users on the system. Please foresee an ample supply of water to that effect.

For the residences connected to the temporary water line, it is recommended to be at home to check the plumbing in case of problems.

After this interruption it will be necessary to let the water run through all the cold water faucets for at least 5 minutes to drain your pipes, especially if the water becomes brownish.

We also recommend you verify the filters in the faucets for an accumulation of particles so the faucets don't become plugged.

In case of an emergency or breakage, immediately contact Mr. Pierre-Olivier Dugas, foreman for Eurovia Québec Construction Inc at 819-574-5841.

It is important to note that

THE BOIL WATER ADVISORY IS STILL IN EFFECT

The lifting of this advisory will be announced by mail and on the municipal web site

Thank you for your understanding and cooperation.

Karen Blouin
Director General
